

rhinohook

Rhinohook

The Rhinohook® from the Decormate® range of designer hook products by Safehook.

Rhinohook's sleek & contemporary design, combined with its unique, robust Safeflex™ impact-absorbing polyurethane construction, ensures Rhinohook's meet the highest standards for safety and durability.

A commercial product suitable for use in aged care, healthcare, hotels, and commercial spaces, Rhinohook's combine durability, safety, and style without compromising function. Australian made performance, when form and function matter.

Intended Use

The Rhinohook® was designed for use in heavy-duty commercial environments where durability, safety, and aesthetic appeal are essential.

Ideal for aged care facilities, healthcare settings, hotels, office buildings, and other high-traffic areas, Rhinohook®s offer a robust and stylish solution for securely hanging garments, bags, towels etc.

The Rhinohook's unique Safeflex™ impact-absorbing polyurethane construction, combined with a tamper-proof design and Steriplus® anti-microbial additives, ensures that it meets the highest standards of performance and hygiene.

Materials/Components

Moulded Mounting Plate and Fascia Covers - Acrylic Styrene Acrylonitrile (ASA)

Hook Moulding - Polyurethane

Screw Fixings: 304 Stainless steel 12# x 1¼ inch CSK

Features

Safeflex™ Impact-Absorbing Construction: Impact absorbing Flexible polyurethane design reduces injuries.

Tamper-Proof Design: Snap-on high-gloss ASA fascia cover.

Heavy-Duty Performance: Supports up to 40kg dead-weights.

Steriplus® Anti-Microbial Additives: Enhances hygiene for healthcare and aged care environments.

Versatile Installation: Suitable for walls, tiles, and other surfaces. Suitable for wet area installations.

Easy to Clean: Low-maintenance smooth design.

Multiple Face Plate Options: Square or round fascia covers options available, variable colour combinations.

Durable Finish: High-gloss ASA moldings ensure a resilient, attractive, and easy-to-maintain surface.

Robust Construction: Engineered for longevity and reliability in demanding commercial settings.

Installation

To assemble the Rhinohook® begin by identifying the three main components and ensuring the screws to be used are suitable for use.

Positioning: Use the base plate as a template to position the hook in the desired location and mark the screw holes.

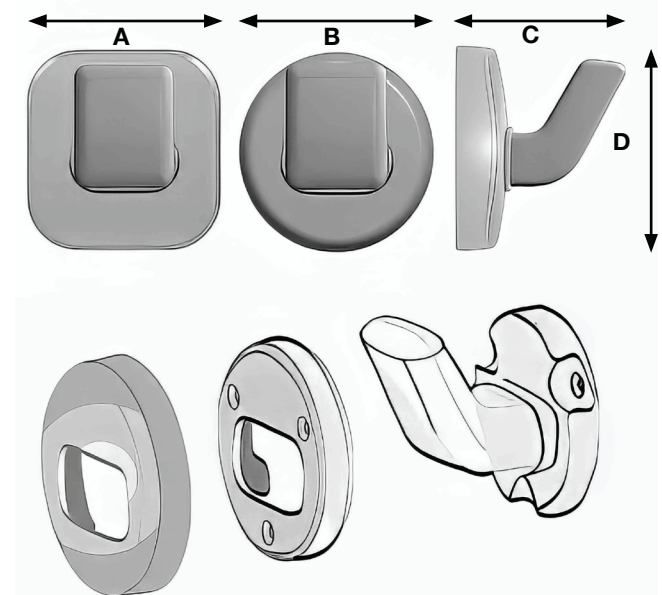

Pre-Drilling: Use a 4.5mm drill bit to pre-drill screw holes.

Fixing: Assemble the base plate and hook moulding, press fit. Using the three stainless steel screws supplied, fix the assembled base plate and hook moulding to the wall.

Fitting the Fascia Plate: Fit the fascia plate over the hook, bump it into place, ensure the fascia plate snap-locks securely.

The strength of your hook is greatly impacted by the strength of the substrate hooks are fitted to. If in doubt, do consult a suitably qualified person prior to installation.
