

stowmate®

FS2400 Fixed Pedestal Unit

FS2400 Storage Unit's from the Stowmate® range of integrated storage solutions by Safehook.

The Stowmate FS2400 storage unit is a dual sided floor-mounted, storage solution designed for installation where wall-mounted storage options are limited. Tuffstuff™ moulded bases with aluminium BagTrac™ rails deliver a safe, durable, and stable storage system for schools and community environments.

A commercial-grade product suitable for use in education, childcare, libraries, and multipurpose facilities, Stowmate FS2400 Unit's offers reliability, and style without compromising function. Australian made performance, when form and function matter.

Intended Use

The Stowmate® FS2400 Unit is designed for use in education and community environments where safety, flexibility, and space efficiency are essential.

Ideal for classrooms, corridors, libraries, childcare centres, and multipurpose facilities, the Stowmate FS2400 Unit provides a practical and durable solution for storing school bags and personal items.

Its robust aluminum BagTrac™ rails, combined with heavy-duty Tuffstuff™ moulded bases, ensure that it meets the highest standards of performance and durability.

Materials/Components

TuffStuff 300 base - Moulded Glass Reinforced PP

Aluminium Bollards and Rails - Low Carbon EcoAl Aluminium

Rail/Bollard Mounting Brackets - Moulded Glass Reinforced Nylon

Features

Tuffstuff™ 300 Heavy-Duty Bases: Injection-moulded construction provides strength, stability, and long-term durability.

BagTrac™ Aluminium Rails: Dual 2.4m media-blasted and clear-anodised rails provide double-sided storage capacity.

Capacity: Comfortably accommodates 40 hooks per unit, securely storing up to 40 school bags.

Low-Carbon Aluminum: Manufactured using EcoAL® low-carbon aluminium for a more sustainable, environmentally responsible product.

Powder-Coated Aluminium Bollards: Durable protective up-rights available in Yellow, Monument Grey, and French Blue.

Hook Compatibility: Suitable for use with iHook® and Euro V2 hook products.

Assembly

To assemble the Stowmate® FS2400 Unit, begin by identifying the two Tuffstuff 300 base components, two vertical bollards, two rails, four rail mounting brackets, and screws supplied. Ensure all parts are present and the assembly surface is level. Hooks supplied separately.

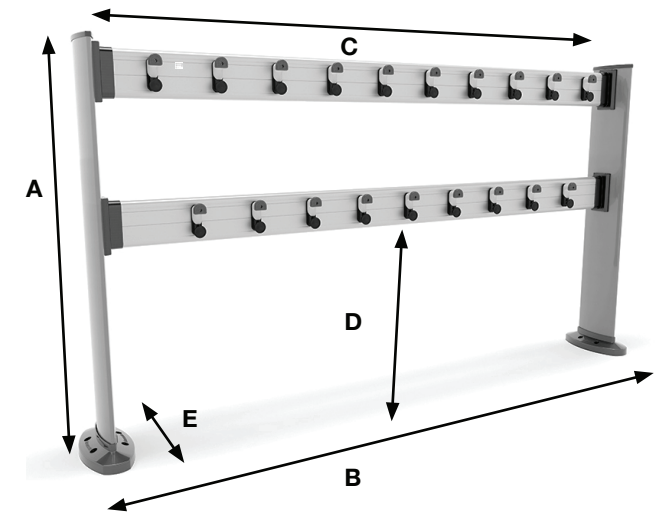

Base and Bollard Assembly: Orient each base so the locating flange aligns with the bollard extrusion. Insert the bollard into the base and secure with the four screws provided, tightening evenly. Repeat for the second base.

Rail Assembly: Screw the rail mounting brackets to each end of both rails. Position the rails between the bollards, locating the brackets onto the bollard mounting points. Once aligned, secure the brackets to the bollards using the screws supplied.

Final Checks: Confirm the unit is square, rails are secure, and all screws are tightened. The unit is designed for use on flat, even floors; if in doubt, consult a suitably qualified installer.

This is an abbreviated assembly explanation. Full installation details are available on our website.

Sustainability

Linc Furniture Pty Ltd is committed to creating products that are not only durable and functional but also environmentally responsible. The Stowmate® FS2400 Storage Unit exemplifies this commitment through its sustainable design and manufacturing process.

Eco-Friendly Materials: Manufactured using EcoAL® low-carbon, recyclable aluminium and durable moulded components.

Energy-Efficient Production: Local production processes prioritise energy efficiency and waste reduction.

Long Lifespan: Heavy-duty construction and superior durability reduce the need for replacement.

Safe and Non-Toxic: Designed with user safety and environmental responsibility in mind.

End-of-Life Recycling: Aluminium rails, powder-coated Aluminium bollards, and moulded components can be recycled at the end of service life.
